SUMMARY

• Full-Stack Developer and 2026 BS Computer Science graduate equipped with hands-on expertise in engineering scalable, high-performance web and mobile applications using React, Next.js, Node.js, TypeScript, PostgreSQL, Supabase, and Flutter. Proven track record in public-sector digitalization and commercial solutions including developing a centralized inventory management system that tracks 1,000+ digital assets across 80+ schools and optimizing database performance by 40% during an internship at SDO Caloocan, alongside building full-stack POS and inventory platforms. Co-developer of a Web3 RegTech compliance verification system for the Bureau of Animal Industry as well as an interactive 3D breadboarding learning management system. Backed by solid foundations in automated CI/CD pipelines and REST APIs.

SKILLS

- **Frontend:** React, Vite, Next.js, TypeScript, JavaScript, Tailwind CSS, CSS, HTML
- **Backend:** Node.js, Express.js , GraphQL , REST API , Java , npm
- **Mobile:** Flutter, Dart
- **Database & Cloud:** PostgreSQL, Supabase, Redis, Firebase, MySQL, Docker, Vercel
- **Automation & AI Tools:** n8n, Claude
- **Tools & Deployment:** Git/GitHub (CI/CD), Jira

EXPERIENCE

Regulatory Compliance Verification — **North Caloocan - Quezon City, Philippines**
Full Stack Developer - Documentation Lead — *Aug 2025 - Feb 2026*

- Co-developed a full-stack Web3 RegTech platform to automate Philippine animal feed compliance verification.
- Designed and implemented a CI/CD pipeline using GitHub Actions with automatic production builds.
- Delivered and formally handed over the system to the Bureau ofAnimal Industry for evaluation.

School Division Office of Caloocan City — **South Caloocan, Philippines**
Full Stack Developer (Intern) — *May 2025 - July 2025*

- Developed a centralized inventory management system using React, Node.js, and PostgreSQL to track over 1,000 digital assets across 80+ public schools.
- Optimized database operations , improving data retrieval speed by 40% for division stakeholders .
- Automated inventory reporting and implemented audit logs to improve operational efficiency and accountability.

Pandayo Coffee — **North Caloocan, Philippines**
Full Stack Developer — *Sept 2026 - Present*

- Developing a full-stack point-of-sale (POS) and inventory system using Next.js, Tailwind, TypeScript, and Supabase.
- Implementing role-based access control for admin, cashiers, and staff using Supabase Auth.
- Building an admin dashboard for real-time inventory tracking and sales monitoring.

PROJECTS

Circuit Cube | React · Vite · TypeScript · Node.js · PostgreSQL — *Software Engineering*

- Built a 3D breadboarding LMS using React and Vite, programming logic gate algorithms and optimizing rendering.
- Programmed complex algorithms to simulate logic gate behaviors, providing a 1:1 digital twin ofphysical hardware.
- Optimized performance to ensure smooth 3 D rendering in-browser.

EDUCATION

University of Caloocan City – Congressional Campus — **Caloocan, Metro Manila**
Bachelor of Science in Computer Science — *Graduation Date: April 2026*

- Thesis of the Year
- Best Technical Documentation
- Best Research Developer

CERTIFICATIONS

- Postman (API Fundamentals), Sololearn (HTML, CSS, & JavaScript), Simplilearn (Generative AI, Cybersecurity & SQL)
